[B09001. POPULATION UNDER 18 YEARS IN HOUSEHOLDS BY HOUSEHOLD TYPE AND AGE OF CHILDREN IN HOUSEHOLDS - Universe: POPULATION UNDER 18 YEARS](#)

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

	Alaska	
	Estimate	Margin of Error
Total:	187,498	+/-326
In family households:	185,082	+/-1,144
In married-couple family households:	129,371	+/-4,469
Under 3 years	21,553	+/-1,481
3 and 4 years	14,752	+/-1,524
5 years	7,607	+/-1,318
6 to 8 years	21,230	+/-2,091
9 to 11 years	19,732	+/-1,878
12 to 14 years	22,450	+/-1,909
15 to 17 years	22,047	+/-1,296
In male householder, no wife present, family households:	16,087	+/-2,339
Under 3 years	1,914	+/-714
3 and 4 years	2,152	+/-865
5 years	508	+/-312
6 to 8 years	2,131	+/-665
9 to 11 years	3,372	+/-907
12 to 14 years	2,895	+/-836
15 to 17 years	3,115	+/-901
In female householder, no husband present, family households:	39,624	+/-4,304
Under 3 years	5,611	+/-1,392
3 and 4 years	2,660	+/-772
5 years	2,265	+/-789
6 to 8 years	7,678	+/-1,590
9 to 11 years	7,176	+/-1,240
12 to 14 years	6,830	+/-1,273
15 to 17 years	7,404	+/-1,077
In nonfamily households:	2,416	+/-1,085
Under 3 years	197	+/-191
3 and 4 years	365	+/-258
5 years	235	+/-291
6 to 8 years	254	+/-200
9 to 11 years	373	+/-272
12 to 14 years	492	+/-349
15 to 17 years	500	+/-353

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:
