B15002. SEX BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 25 YEARS AND OVER -

Universe: [POPULATION 25 YEARS AND OVER](#)

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	387,609	+/-1,667
Male:	195,318	+/-1,098
No schooling completed	958	+/-533
Nursery to 4th grade	1,290	+/-397
5th and 6th grade	1,020	+/-384
7th and 8th grade	3,925	+/-949
9th grade	1,833	+/-688
10th grade	2,209	+/-537
11th grade	4,201	+/-937
12th grade, no diploma	1,859	+/-672
High school graduate (includes equivalency)	61,078	+/-3,254
Some college, less than 1 year	13,904	+/-1,763
Some college, 1 or more years, no degree	38,943	+/-2,899
Associate's degree	14,331	+/-1,579
Bachelor's degree	30,725	+/-2,549
Master's degree	12,733	+/-1,313
Professional school degree	3,861	+/-846
Doctorate degree	2,448	+/-771
Female:	192,291	+/-1,414
No schooling completed	873	+/-432
Nursery to 4th grade	1,191	+/-359
5th and 6th grade	1,425	+/-460
7th and 8th grade	2,654	+/-672
9th grade	2,162	+/-780
10th grade	3,258	+/-845
11th grade	3,625	+/-795
12th grade, no diploma	2,251	+/-627
High school graduate (includes equivalency)	51,024	+/-2,429
Some college, less than 1 year	15,025	+/-1,693
Some college, 1 or more years, no degree	37,409	+/-2,496
Associate's degree	15,420	+/-1,942
Bachelor's degree	35,949	+/-2,445
Master's degree	15,990	+/-1,701
Professional school degree	2,514	+/-609
Doctorate degree	1,521	+/-631

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended

distribution. A statistical test is not appropriate.

7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:
