## B16007. AGE BY LANGUAGE SPOKEN AT HOME FOR THE POPULATION 5 YEARS AND OVER -

Universe: [POPULATION 5 YEARS AND OVER](#)

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

	Alaska	
	Estimate	Margin of Error
Total:	592,520	+/-830
5 to 17 years:	138,294	+/-944
Speak only English	121,743	+/-1,842
Speak Spanish	3,950	+/-1,149
Speak other Indo-European languages	1,585	+/-653
Speak Asian and Pacific Island languages	4,311	+/-1,247
Speak other languages	6,705	+/-806
18 to 64 years:	412,070	+/-1,033
Speak only English	356,031	+/-3,080
Speak Spanish	11,308	+/-1,457
Speak other Indo-European languages	8,021	+/-1,801
Speak Asian and Pacific Island languages	16,620	+/-1,323
Speak other languages	20,090	+/-1,892
65 years and over:	42,156	+/-1,002
Speak only English	34,404	+/-928
Speak Spanish	654	+/-259
Speak other Indo-European languages	1,086	+/-397
Speak Asian and Pacific Island languages	2,222	+/-636
Speak other languages	3,790	+/-463

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

#### Standard Error/Variance documentation for this dataset:
