B19101C. FAMILY INCOME IN THE PAST 12 MONTHS (IN 2005 INFLATION-ADJUSTED DOLLARS)

(AMERICAN INDIAN AND ALASKA NATIVE ALONE HOUSEHOLDER) - Universe: FAMILIES WITH A

HOUSEHOLDER WHO IS AMERICAN INDIAN AND ALASKA NATIVE ALONE

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see <u>Survey Methodology</u>.

	Alaska	
	Estimate	Margin of Error
Total:	18,478	+/-1,341
Less than \$10,000	1,582	+/-538
\$10,000 to \$14,999	929	+/-277
\$15,000 to \$19,999	1,918	+/-550
\$20,000 to \$24,999	1,294	+/-468
\$25,000 to \$29,999	1,094	+/-309
\$30,000 to \$34,999	1,154	+/-340
\$35,000 to \$39,999	987	+/-286
\$40,000 to \$44,999	785	+/-230
\$45,000 to \$49,999	1,115	+/-475
\$50,000 to \$59,999	1,795	+/-439
\$60,000 to \$74,999	1,381	+/-325
\$75,000 to \$99,999	1,977	+/-499
\$100,000 to \$124,999	1,342	+/-557
\$125,000 to \$149,999	661	+/-343
\$150,000 to \$199,999	210	+/-161
\$200,000 or more	254	+/-194

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see <u>Accuracy of the Data</u>). The effect of nonsampling error is not represented in these tables.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Explanation of Symbols:

1. An ^{1*1} entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An "**" entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution. 4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '- following a median estimate means the median fails in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
