B23006. EDUCATIONAL ATTAINMENT BY EMPLOYMENT STATUS FOR THE POPULATION 25 TO 64

YEARS - Universe: POPULATION 25 TO 64 YEARS

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	345,453	+/-1,875
Less than high school graduate:	24,349	+/-2,292
In labor force:	16,947	+/-2,021
In Armed Forces	0	+/-233
Civilian:	16,947	+/-2,021
Employed	14,467	+/-1,933
Unemployed	2,480	+/-720
Not in labor force	7,402	+/-1,139
High school graduate:	100,131	+/-4,367
In labor force:	75,479	+/-4,370
In Armed Forces	807	+/-354
Civilian:	74,672	+/-4,327
Employed	66,598	+/-4,128
Unemployed	8,074	+/-1,104
Not in labor force	24,652	+/-1,917
Some college or associate's degree:	124,119	+/-4,523
In labor force:	99,531	+/-4,378
In Armed Forces	2,484	+/-614
Civilian:	97,047	+/-4,424
Employed	91,354	+/-4,254
Unemployed	5,693	+/-997
Not in labor force	24,588	+/-2,286
Bachelor's degree or higher:	96,854	+/-3,775
In labor force:	82,064	+/-3,538
In Armed Forces	2,317	+/-648
Civilian:	79,747	+/-3,579
Employed	77,664	+/-3,555
Unemployed	2,083	+/-694
Not in labor force	14,790	+/-1,703

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not

appropriate.

Standard Error/Variance documentation for this dataset:
