B25007. TENURE BY AGE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	233,252	+/-2,012
Owner occupied:	147,019	+/-3,283
Householder 15 to 24 years	2,090	+/-682
Householder 25 to 34 years	16,155	+/-1,551
Householder 35 to 44 years	34,438	+/-1,910
Householder 45 to 54 years	45,464	+/-1,596
Householder 55 to 59 years	17,349	+/-1,497
Householder 60 to 64 years	11,924	+/-1,514
Householder 65 to 74 years	12,635	+/-988
Householder 75 to 84 years	5,779	+/-754
Householder 85 years and over	1,185	+/-429
Renter occupied:	86,233	+/-3,244
Householder 15 to 24 years	14,148	+/-1,671
Householder 25 to 34 years	22,070	+/-1,959
Householder 35 to 44 years	20,668	+/-2,241
Householder 45 to 54 years	15,596	+/-1,689
Householder 55 to 59 years	5,021	+/-1,133
Householder 60 to 64 years	2,771	+/-723
Householder 65 to 74 years	2,782	+/-729
Householder 75 to 84 years	1,903	+/-449
Householder 85 years and over	1,274	+/-433

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:
