B25027. UNITS IN STRUCTURE BY YEAR STRUCTURE BUILT - Universe: VACANT HOUSING UNITS

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	40,994	+/-2,012
Single family units:	28,527	+/-1,521
Built 2005 or later	144	+/-194
Built 2000 to 2004	1,783	+/-535
Built 1990 to 1999	6,046	+/-757
Built 1980 to 1989	8,403	+/-1,023
Built 1960 to 1979	9,332	+/-1,270
Built 1940 to 1959	1,997	+/-612
Built 1939 or earlier	822	+/-292
Multifamily units:	9,723	+/-1,576
Built 2005 or later	0	+/-233
Built 2000 to 2004	340	+/-281
Built 1990 to 1999	1,472	+/-543
Built 1980 to 1989	2,182	+/-865
Built 1960 to 1979	3,895	+/-1,092
Built 1940 to 1959	1,669	+/-747
Built 1939 or earlier	165	+/-164
Mobile home and all other types of units:	2,744	+/-617
Built 2005 or later	17	+/-27
Built 2000 to 2004	141	+/-121
Built 1990 to 1999	130	+/-144
Built 1980 to 1989	547	+/-329
Built 1960 to 1979	1,686	+/-592
Built 1940 to 1959	172	+/-159
Built 1939 or earlier	51	+/-83

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:

[2005 Accuracy of the Data](#)

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
