B25036. TENURE BY YEAR STRUCTURE BUILT - Universe: OCCUPIED HOUSING UNITS

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	233,252	+/-2,012
Owner occupied:	147,019	+/-3,283
Built 2005 or later	420	+/-235
Built 2000 to 2004	11,829	+/-1,452
Built 1990 to 1999	24,940	+/-1,837
Built 1980 to 1989	42,786	+/-2,331
Built 1970 to 1979	40,083	+/-2,799
Built 1960 to 1969	15,333	+/-1,496
Built 1950 to 1959	7,506	+/-894
Built 1940 to 1949	2,140	+/-556
Built 1939 or earlier	1,982	+/-531
Renter occupied:	86,233	+/-3,244
Built 2005 or later	203	+/-276
Built 2000 to 2004	4,804	+/-940
Built 1990 to 1999	9,925	+/-1,295
Built 1980 to 1989	21,504	+/-2,186
Built 1970 to 1979	25,355	+/-2,245
Built 1960 to 1969	10,917	+/-1,534
Built 1950 to 1959	8,929	+/-1,572
Built 1940 to 1949	2,791	+/-831
Built 1939 or earlier	1,805	+/-716

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:
