### [B25115. TENURE BY HOUSEHOLD TYPE AND PRESENCE AND AGE OF OWN CHILDREN - Universe: OCCUPIED HOUSING UNITS](#)

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

	Alaska	
	Estimate	Margin of Error
Total:	233,252	+/-2,012
Owner occupied:	147,019	+/-3,283
Family households:	112,217	+/-3,811
Married-couple family:	90,505	+/-3,483
With own children under 18 years	41,950	+/-2,569
No own children under 18 years	48,555	+/-2,489
Other family:	21,712	+/-2,008
Male householder, no wife present:	7,176	+/-1,233
With own children under 18 years	4,524	+/-915
No own children under 18 years	2,652	+/-745
Female householder, no husband present:	14,536	+/-1,772
With own children under 18 years	8,269	+/-1,395
No own children under 18 years	6,267	+/-1,006
Nonfamily households	34,802	+/-2,624
Renter occupied:	86,233	+/-3,244
Family households:	44,970	+/-2,647
Married-couple family:	25,848	+/-1,795
With own children under 18 years	15,384	+/-1,628
No own children under 18 years	10,464	+/-1,291
Other family:	19,122	+/-2,131
Male householder, no wife present:	5,997	+/-1,219
With own children under 18 years	4,003	+/-1,065
No own children under 18 years	1,994	+/-718
Female householder, no husband present:	13,125	+/-1,841
With own children under 18 years	9,712	+/-1,529
No own children under 18 years	3,413	+/-911
Nonfamily households	41,263	+/-2,893

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
