[B25116. TENURE BY HOUSEHOLD SIZE BY AGE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS](#)

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	233,252	+/-2,012
Owner occupied:	147,019	+/-3,283
1-person household:	26,542	+/-2,156
Householder 15 to 54 years	13,023	+/-1,382
Householder 55 to 64 years	7,278	+/-1,155
Householder 65 to 74 years	3,428	+/-726
Householder 75 years and over	2,813	+/-564
2-or-more person household:	120,477	+/-3,433
Householder 15 to 54 years	85,124	+/-2,844
Householder 55 to 64 years	21,995	+/-1,586
Householder 65 to 74 years	9,207	+/-907
Householder 75 years and over	4,151	+/-704
Renter occupied:	86,233	+/-3,244
1-person household:	30,870	+/-2,736
Householder 15 to 54 years	22,553	+/-2,229
Householder 55 to 64 years	4,427	+/-962
Householder 65 to 74 years	1,335	+/-530
Householder 75 years and over	2,555	+/-574
2-or-more person household:	55,363	+/-2,842
Householder 15 to 54 years	49,929	+/-2,689
Householder 55 to 64 years	3,365	+/-848
Householder 65 to 74 years	1,447	+/-538
Householder 75 years and over	622	+/-256

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Standard Error/Variance documentation for this dataset:
