

B07003. RESIDENCE 1 YEAR AGO BY SEX - Universe: POPULATION 1 YEAR AND OVER

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	626,709	624,610	628,808
Male	318,160	311,326	324,994
Female	308,549	303,347	313,751
Same house 1 year ago:	515,659	508,201	523,117
Male	263,011	256,360	269,662
Female	252,648	245,630	259,666
Moved within same county:	68,364	61,389	75,339
Male	33,331	29,164	37,498
Female	35,033	31,413	38,653
Moved from different county within same state:	11,241	8,763	13,719
Male	6,229	4,604	7,854
Female	5,012	3,604	6,420
Moved from different state:	28,152	24,110	32,194
Male	13,423	10,687	16,159
Female	14,729	12,929	16,529
Moved from abroad:	3,293	2,237	4,349
Male	2,166	1,368	2,964
Female	1,127	561	1,693

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
