

[B09002. OWN CHILDREN UNDER 18 YEARS BY FAMILY TYPE AND AGE - Universe: OWN CHILDREN UNDER 18 YEARS](#)

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	170,781	167,166	174,396
In married-couple families:	122,577	118,464	126,690
Under 3 years	19,764	18,260	21,268
3 and 4 years	13,018	10,730	15,306
5 years	6,142	4,617	7,667
6 to 11 years	38,235	34,804	41,666
12 to 17 years	45,418	42,260	48,576
In other families:	48,204	43,446	52,962
Male householder, no wife present:	20,925	17,639	24,211
Under 3 years	1,861	949	2,773
3 and 4 years	2,554	1,192	3,916
5 years	368	88	648
6 to 11 years	6,809	5,135	8,483
12 to 17 years	9,333	6,458	12,208
Female householder, no husband present:	27,279	23,623	30,935
Under 3 years	3,006	2,070	3,942
3 and 4 years	3,722	2,326	5,118
5 years	1,151	604	1,698
6 to 11 years	9,169	7,173	11,165
12 to 17 years	10,231	8,027	12,435

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
