

**B02005. AMERICAN INDIAN AND ALASKA NATIVE ALONE WITH ONE TRIBE REPORTED FOR SELECTED TRIBAL GROUPINGS - Universe: PEOPLE WHO ARE AMERICAN INDIAN AND ALASKA NATIVE ALONE - TOTAL TRIBES TALLIED FOR PEOPLE WITH ONE TRIBE ONLY, AND PEOPLE WITH NO TRIBE REPORTED**

Data Set: [2004 American Community Survey](#)  
Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	81,748	78,829	84,667
American Indian tribes, specified:	7,402	2,131	12,673
Apache alone	180	0	398
Blackfeet alone	112	0	262
Cherokee alone	1,247	363	2,131
Cheyenne alone	0	0	274
Chickasaw alone	105	0	281
Chippewa alone	0	0	274
Choctaw alone	1,056	486	1,626

Sioux alone	305	49	561
Tohono O'Odham alone	0	0	274
Ute alone	0	0	274
Yakama alone	0	0	274
Yaqui alone	0	0	274
Yuman alone	0	0	274
All other American Indian tribes	1,869	424	3,314
American Indian tribes, not specified	488	0	996
Alaska Native tribes, specified:	63,653	57,763	69,543
Alaskan Athabaskan alone	9,422	5,874	12,970
Aleut alone	2,674	1,310	4,038
Eskimo alone	30,455	5,834	55,076
Tlingit-Haida alone	11,810	0	25,893
All other Alaska Native tribes	9,292	0	24,842
Alaska Native tribes, not specified	10,205	8,568	11,842
American Indian tribes or Alaska Native tribes, not specified	0	0	274

Source: U.S. Census Bureau, 2004 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The "Total" category includes people who only reported as "American Indian or Alaska Native" either by specifying one or more American Indian tribes or tribal groupings or by responding with a generic term such as "American Indian" or "Alaska Native."

The "All other specified American Indian tribes" category includes people who reported one specified American Indian tribe or tribal grouping not shown above as well as people who reported two or more specified American Indian tribes or tribal groupings, but only reported as American Indian or Alaska Native.

The "All other specified Alaska Native tribes" category includes people who reported one specified Alaska Native tribe or tribal grouping not shown above as well as people who reported two or more specified Alaska Native tribes or tribal groupings, but only reported as American Indian or Alaska Native.

Explanation of Symbols:

1. An "\*" entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An "\*\*\*\*" entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An "-" entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An "\*\*\*\*" entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An "\*\*\*\*\*" entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
