B15002C. SEX BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 25 YEARS AND OVER (AMERICAN INDIAN AND ALASKA NATIVE ALONE) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION 25 YEARS AND OVER

Data Set: 2004 American Community Survey

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

« hide upper and lower bounds

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	44,153	41,784	46,522
Male:	18,940	17,657	20,223
Less than 9th grade	1,395	0	2,903
9th to 12th grade, no diploma	1,333	710	1,956
High school graduate (includes equivalency)	11,362	9,415	13,309
Some college, no degree	3,633	1,819	5,447
Associate's degree	220	52	388
Bachelor's degree	617	265	969
Graduate degree	380	56	704
Female:	25,213	23,762	26,664
Less than 9th grade	1,866	751	2,981
9th to 12th grade, no diploma	3,473	2,562	4,384
High school graduate (includes equivalency)	10,323	9,042	11,604
Some college, no degree	6,093	4,289	7,897
Associate's degree	846	259	1,433
Bachelor's degree	1,670	700	2,640
Graduate degree	942	288	1,596

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
