B16007. AGE BY LANGUAGE SPOKEN AT HOME FOR THE POPULATION 5 YEARS AND OVER -
Universe: POPULATION 5 YEARS AND OVER
Data Set: 2004 American Community Survey
Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

« hide upper and lower bounds

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	586,786	585,625	587,947
5 to 17 years:	138,544	137,104	139,984
Speak only English	121,712	116,318	127,106
Speak Spanish	3,720	2,789	4,651
Speak other Indo-European languages	2,177	1,366	2,988
Speak Asian and Pacific Island languages	5,052	3,636	6,468
Speak other languages	5,883	1,002	10,764
18 to 64 years:	409,041	407,802	410,280
Speak only English	356,768	346,138	367,398
Speak Spanish	13,178	11,518	14,838
Speak other Indo-European languages	7,362	5,517	9,207
Speak Asian and Pacific Island languages	15,594	14,213	16,975
Speak other languages	16,139	6,503	25,775
65 years and over:	39,201	38,220	40,182
Speak only English	33,512	31,456	35,568
Speak Spanish	547	236	858
Speak other Indo-European languages	712	353	1,071
Speak Asian and Pacific Island languages	2,018	1,405	2,631
Speak other languages	2,412	1,352	3,472

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
