

B12001. SEX BY MARITAL STATUS FOR THE POPULATION 15 YEARS AND OVER - Universe:
POPULATION 15 YEARS AND OVER

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska			
	Estimate	Lower Bound	Upper Bound
Total:	483,115	481,494	484,736
Male:	242,641	240,362	244,920
Never married	84,697	82,228	87,166
Now married:	130,087	127,028	133,146
Married, spouse present	120,839	117,822	123,856
Married, spouse absent:	9,248	7,451	11,045
Separated	4,533	2,502	6,564
Other	4,715	3,557	5,873
Widowed	3,138	2,263	4,013
Divorced	24,719	22,775	26,663
Female:	240,474	237,162	243,786
Never married	64,034	59,978	68,090
Now married:	134,364	130,455	138,273
Married, spouse present	123,990	119,463	128,517
Married, spouse absent:	10,374	8,499	12,249
Separated	5,268	4,121	6,415
Other	5,106	3,975	6,237
Widowed	11,599	10,121	13,077
Divorced	30,477	27,581	33,373

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
