

B14002. SEX BY SCHOOL ENROLLMENT BY LEVEL OF SCHOOL BY TYPE OF SCHOOL FOR

THE POPULATION 3 YEARS AND OVER - Universe: POPULATION 3 YEARS AND OVER

Data Set: 2004 American Community Survey Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Michael 2015.

Total:	607,897	605,980	609,814
Male:	308,751	303,186	314,316
Enrolled in school:	95,958	91,420	100,496
Enrolled in nursery school, preschool:	4,413	3,387	5,439
Public school	3,012	2,115	3,909
Private school	1,401	793	2,00
Enrolled in kindergarten:	4,386	2,696	6,07
Public school	4,045	2,500	5,59
Private school	341	78	60
Enrolled in grade 1 to grade 4:	20,227	18,526	21,92
Public school	18,802	17,004	20,60
Private school	1,425	834	2,01
Enrolled in grade 5 to grade 8:	21,846	19,779	23,91
Public school	20,447	18,390	22,50
Private school	1,399	774	2,02
Enrolled in grade 9 to grade 12:	25,149	23,376	26,92
Public school	23,714	21,926	25,50
Private school	1,435	817	2,05
Enrolled in college undergraduate years:	16,726	14,120	19,33
Public school	13,975	11,551	16,39
Private school	2,751	1,745	3,75
Enrolled in graduate or professional school:	3,211	2,244	4,17
Public school	2,206	1,273	3,13
Private school	1,005	431	1,57
Not enrolled in school	212,793	209,600	215,98

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The variability is represented intograted to a confidence interval. The interval area is a percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

- Explanation of Symbols:

 1. An "" entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

 2. An "" entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard
- error and thus the lower and upper bounds. A statistical test is not appropriate.

 3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.

 4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

- 4. An 1- following a median estimate means the median falls in the upper interval of an open-ended distribution.
 5. An '÷ following a median estimate means the median falls in the upper interval of an open-ended distribution.
 6. An "**** entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
 7. An "***** entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
