B17020C. POVERTY STATUS IN THE PAST 12 MONTHS BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION FOR WHOM POVERTY STATUS IS DETERMINED
Data Set: 2004 American Community Survey
Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

« hide upper and lower bounds

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	81,573	78,704	84,442
Income in the past 12 months below poverty level:	16,174	10,293	22,055
Under 5 years	1,973	455	3,491
5 years	433	53	813
6 to 11 years	2,099	592	3,606
12 to 17 years	3,819	2,596	5,042
18 to 64 years	7,733	5,949	9,517
65 to 74 years	32	0	88
75 years and over	85	0	231
Income in the past 12 months at or above poverty level:	65,399	59,885	70,913
Under 5 years	6,148	3,916	8,380
5 years	76	0	198
6 to 11 years	6,264	4,644	7,884
12 to 17 years	8,833	6,925	10,741
18 to 64 years	38,900	37,294	40,506
65 to 74 years	2,871	2,275	3,467
75 years and over	2,307	1,205	3,409

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
