

[B25009. TENURE BY HOUSEHOLD SIZE - Universe: OCCUPIED HOUSING UNITS](#)

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	228,358	225,330	231,386
Owner occupied:	149,669	145,616	153,722
1-person household	26,382	24,452	28,312
2-person household	56,399	52,920	59,878
3-person household	22,972	20,768	25,176
4-person household	24,511	22,006	27,016
5-person household	13,177	11,099	15,255
6-person household	4,072	3,146	4,998
7-or-more person household	2,156	1,558	2,754
Renter occupied:	78,689	74,290	83,088
1-person household	26,317	24,206	28,428
2-person household	24,406	22,308	26,504
3-person household	11,402	9,502	13,302
4-person household	8,494	6,932	10,056
5-person household	4,503	3,349	5,657
6-person household	1,975	556	3,394
7-or-more person household	1,592	505	2,679

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
