

**[B25028. UNITS IN STRUCTURE BY ROOMS - Universe: VACANT HOUSING UNITS](#)**

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	43,175	40,147	46,203
Single family units:	28,179	25,569	30,789
1 room	5,875	5,125	6,625
2 or 3 rooms	10,964	8,672	13,256
4 or 5 rooms	8,425	7,104	9,746
6 or 7 rooms	2,042	1,405	2,679
8 or more rooms	873	331	1,415
Multifamily units:	10,082	8,213	11,951
1 room	1,600	857	2,343
2 or 3 rooms	3,082	1,978	4,186
4 or 5 rooms	4,937	3,792	6,082
6 or 7 rooms	431	25	837
8 or more rooms	32	0	84
Mobile home and all other types of units:	4,914	2,612	7,216
1 room	265	0	564
2 or 3 rooms	2,288	907	3,669
4 or 5 rooms	2,202	1,218	3,186
6 or 7 rooms	159	0	430
8 or more rooms	0	0	274

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
