

[P011. HOUSEHOLD SIZE, HOUSEHOLD TYPE, AND PRESENCE OF OWN CHILDREN - Universe: HOUSEHOLDS](#)

Data Set: [2001 Supplementary Survey Summary Tables](#)

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska	Estimate	Lower Bound	Upper Bound
Total:	220,110	217,508	222,712
1-person household:	51,509	47,740	55,278
Male householder	28,396	25,566	31,226
Female householder	23,113	21,206	25,020
2-or-more-person household:	168,601	163,065	174,137
Family households:	152,316	145,865	158,768
Married-couple family:	113,635	108,391	118,879
With own children under 18 years	59,947	53,796	66,098
No own children under 18 years	53,688	50,845	56,531
Other family:	38,681	35,028	42,334
Male householder, no wife present:	12,707	10,874	14,540
With own children under 18 years	7,896	6,705	9,087
No own children under 18 years	4,811	3,549	6,073
Female householder, no husband present:	25,974	23,336	28,612
With own children under 18 years	19,408	17,230	21,586
No own children under 18 years	6,566	5,508	7,624
Nonfamily households:	16,285	14,430	18,140
Male householder	10,320	8,987	11,653
Female householder	5,965	4,690	7,240

**Notes**

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '\*\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
