

P011C. HOUSEHOLD SIZE BY HOUSEHOLD TYPE BY PRESENCE OF OWN CHILDREN (AMERICAN INDIAN AND ALASKA NATIVE ALONE HOUSEHOLDER) - Universe: HOUSEHOLDS WITH A HOUSEHOLDER WHO IS AMERICAN INDIAN AND ALASKA NATIVE ALONE

Data Set: [2001 Supplementary Survey Summary Tables](#)

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska	Estimate	Lower Bound	Upper Bound
Total:	25,017	23,771	26,263
1-person household:	4,376	1,518	7,234
Male householder	2,979	633	5,325
Female householder	1,397	689	2,105
2-or-more-person household:	20,641	17,666	23,616
Family households:	19,407	16,099	22,715
Married-couple family:	9,887	7,891	11,884
With own children under 18 years	5,746	3,499	7,993
No own children under 18 years	4,141	3,329	4,953
Other family:	9,520	7,443	11,597
Male householder, no wife present:	2,717	1,006	4,428
With own children under 18 years	1,549	638	2,460
No own children under 18 years	1,168	234	2,102
Female householder, no husband present:	6,803	5,838	7,768
With own children under 18 years	5,415	4,702	6,128
No own children under 18 years	1,388	835	1,941
Nonfamily households:	1,234	576	1,892
Male householder	540	144	936
Female householder	694	60	1,328

Notes

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
