

**P012. HOUSEHOLDS BY PRESENCE OF PEOPLE UNDER 18 YEARS BY HOUSEHOLD TYPE -
Universe: HOUSEHOLDS**

Data Set: [2001 Supplementary Survey Summary Tables](#)

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska	Estimate	Lower Bound	Upper Bound
Total:	220,110	217,508	222,712
Households with one or more people under 18 years:	95,435	89,434	101,436
Family households:	93,718	87,300	100,137
Married-couple family	63,566	57,903	69,229
Other family:	30,152	27,522	32,782
Male householder, no wife present	9,410	8,001	10,819
Female householder, no husband present	20,742	18,676	22,808
Nonfamily households:	1,717	1,022	2,412
Male householder	1,202	625	1,780
Female householder	515	226	804
Households with no people under 18 years:	124,675	120,147	129,203
Family households:	58,598	56,075	61,121
Married-couple family	50,069	47,510	52,628
Other family:	8,529	7,014	10,044
Male householder, no wife present	3,297	2,416	4,178
Female householder, no husband present	5,232	4,230	6,234
Nonfamily households:	66,077	61,668	70,486
Male householder	37,514	34,681	40,347
Female householder	28,563	26,144	30,982

Notes

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
