

P017. HOUSEHOLD TYPE BY AGE OF HOUSEHOLDER - Universe: HOUSEHOLDS

Data Set: 2001 Supplementary Survey Summary Tables

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see <u>Survey Methodology</u>.

Alaska	Estimate	Lower Bound	Upper Bound
Total:	220,110	217,508	222,712
Family households:	152,316	145,865	158,768
Householder 15 to 24 years	8,591	6,946	10,236
Householder 25 to 34 years	30,404	28,705	32,104
Householder 35 to 44 years	42,876	38,426	47,326
Householder 45 to 54 years	40,482	38,622	42,342
Householder 55 to 64 years	19,211	17,820	20,602
Householder 65 to 74 years	7,734	6,759	8,709
Householder 75 to 84 years	2,495	1,843	3,147
Householder 85 years and over	523	71	975
Nonfamily households:	67,794	62,997	72,591
Householder 15 to 24 years	5,993	5,122	6,864
Householder 25 to 34 years	9,699	8,433	10,965
Householder 35 to 44 years	14,417	11,435	17,399
Householder 45 to 54 years	16,153	14,406	17,900
Householder 55 to 64 years	11,021	9,265	12,777
Householder 65 to 74 years	6,216	5,256	7,176
Householder 75 to 84 years	3,247	2,622	3,872
Householder 85 years and over	1,048	436	1,660

Notes

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

- 1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

 2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard
- error and thus the lower and upper bounds. A statistical test is not appropriate.
- 3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
- 4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
