

P022. HOUSEHOLD TYPE BY HOUSEHOLD SIZE - Universe: HOUSEHOLDS

Data Set: [2001 Supplementary Survey Summary Tables](#)

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska	Estimate	Lower Bound	Upper Bound
Total:	220,110	217,508	222,712
Family households:	152,316	145,865	158,768
2-person household	54,979	52,453	57,505
3-person household	37,059	34,526	39,592
4-person household	32,441	27,484	37,398
5-person household	17,019	15,090	18,948
6-person household	6,463	5,140	7,786
7-or-more person household	4,355	3,532	5,178
Nonfamily households:	67,794	62,997	72,591
1-person household	51,509	47,740	55,278
2-person household	12,161	10,701	13,621
3-person household	2,633	1,937	3,329
4-person household	981	408	1,554
5-person household	184	12	356
6-person household	153	0	387
7-or-more person household	173	0	444

Notes

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
