

PCT003. AMERICAN INDIAN AND ALASKA NATIVE ALONE WITH ONE TRIBE REPORTED FOR SELECTED TRIBES - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION - TOTAL TRIBES TALLIED FOR PEOPLE WITH ONE TRIBE ONLY, AND PEOPLE WITH NO TRIBE REPORTED

Data Set: 2001 Supplementary Survey Summary Tables

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Table with 4 columns: Alaska, Estimate, Lower Bound, Upper Bound. Rows include Total tribes tallied, American Indian tribes (e.g., Apache, Blackfeet, Cherokee), and Alaska Native tribes (e.g., Alaskan Athabaskan, Aleut, Eskimo).

Notes

The 2001 Supplementary Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability.

Click on the table title to access subject characteristics and code lists related to this table.

- 1. An '-' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
