

P012. HOUSEHOLDS BY PRESENCE OF PEOPLE UNDER 18 YEARS BY HOUSEHOLD TYPE -

Universe: HOUSEHOLDS

Data Set: [2002 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	225,474	221,333	229,616
Households with one or more people under 18 years:	93,910	88,104	99,716
Family households:	92,641	86,982	98,301
Married-couple family	64,320	60,532	68,108
Other family:	28,321	25,077	31,565
Male householder, no wife present	8,748	7,141	10,355
Female householder, no husband present	19,573	16,654	22,492
Nonfamily households:	1,269	723	1,815
Male householder	1,049	511	1,587
Female householder	220	12	428
Households with no people under 18 years:	131,564	127,436	135,692
Family households:	68,385	65,978	70,792
Married-couple family	59,920	57,620	62,220
Other family:	8,465	6,965	9,965
Male householder, no wife present	4,209	3,034	5,384
Female householder, no husband present	4,256	2,915	5,597
Nonfamily households:	63,179	59,331	67,027
Male householder	35,926	33,438	38,414
Female householder	27,253	24,748	29,758

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
