P017. HOUSEHOLD TYPE BY AGE OF HOUSEHOLDER - Universe: HOUSEHOLDS Data Set: 2002 American Community Survey Summary Tables

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	225,474	221,333	229,616
Family households:	161,026	154,862	167,190
Householder 15 to 24 years	6,469	5,583	7,355
Householder 25 to 34 years	29,332	27,352	31,312
Householder 35 to 44 years	44,819	41,613	48,025
Householder 45 to 54 years	44,256	41,045	47,467
Householder 55 to 64 years	22,249	19,899	24,599
Householder 65 to 74 years	8,763	7,730	9,796
Householder 75 to 84 years	4,635	2,855	6,415
Householder 85 years and over	503	119	887
Nonfamily households:	64,448	60,666	68,230
Householder 15 to 24 years	4,832	3,675	5,989
Householder 25 to 34 years	9,398	8,179	10,617
Householder 35 to 44 years	11,806	10,080	13,532
Householder 45 to 54 years	18,227	16,495	19,960
Householder 55 to 64 years	10,308	8,724	11,892
Householder 65 to 74 years	5,592	4,285	6,899
Householder 75 to 84 years	3,947	2,982	4,912
Householder 85 years and over	338	54	622

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group guarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An I** entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.

4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
