P028. OWN CHILDREN UNDER 18 YEARS BY FAMILY TYPE AND AGE - Universe: OWN CHILDREN UNDER 18 YEARS
Data Set: 2002 American Community Survey Summary Tables
Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	172,194	169,881	174,507
In married-couple families:	128,303	124,317	132,289
Under 3 years	19,204	17,803	20,605
3 and 4 years	13,573	12,276	14,870
5 years	6,074	5,173	6,975
6 to 11 years	44,203	41,139	47,267
12 to 17 years	45,249	42,376	48,122
In other families:	43,891	39,962	47,820
Male householder, no wife present:	10,840	8,187	13,493
Under 3 years	1,278	689	1,867
3 and 4 years	1,233	590	1,877
5 years	606	116	1,096
6 to 11 years	4,097	2,520	5,674
12 to 17 years	3,626	2,483	4,769
Female householder, no husband present:	33,051	29,456	36,646
Under 3 years	4,483	3,153	5,813
3 and 4 years	3,369	2,460	4,278
5 years	1,310	780	1,840
6 to 11 years	10,087	7,587	12,587
12 to 17 years	13,802	11,918	15,686

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
