

P115C. POVERTY STATUS IN THE PAST 12 MONTHS BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION FOR WHOM POVERTY STATUS IS DETERMINED

Data Set: 2002 American Community Survey Summary Tables

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey M

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	82,235	71,357	93,113
Income in the past 12 months below poverty level:	11,782	8,423	15,141
Under 5 years	3,357	2,629	4,085
5 years	351	0	846
6 to 11 years	1,000	345	1,655
12 to 17 years	575	232	918
18 to 64 years	6,267	3,934	8,600
65 to 74 years	44	0	122
75 years and over	188	0	554
Income in the past 12 months at or above poverty level:	70,453	62,041	78,865
Under 5 years	4,755	3,131	6,379
5 years	825	381	1,269
6 to 11 years	10,609	7,806	13,412
12 to 17 years	8,854	7,018	10,690
18 to 64 years	40,766	37,775	43,757
65 to 74 years	2,289	923	3,655
75 years and over	2,355	400	4,310

## Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Click on the table title to access subject characteristics and code lists related to this table.

- 1. An \*\* entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard
- error and thus the lower and upper bounds. A statistical test is not appropriate.

  2. An '\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

  3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
- 4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
  6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 7. An '\*\*\*\*\* entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
