

### H005. RACE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS

Data Set: [2002 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	225,474	221,333	229,616
Householder who is White alone	171,012	165,183	176,841
Householder who is Black or African American alone	7,455	6,691	8,219
Householder who is American Indian and Alaska Native alone	25,088	22,062	28,114
Householder who is Asian alone	6,831	5,645	8,017
Householder who is Native Hawaiian and Other Pacific Islander alone	793	460	1,126
Householder who is Some other race alone	4,005	3,129	4,881
Householder who is Two or more races:	10,290	7,883	12,697
Householder who is Two races including Some other race	393	131	655
Householder who is Two races excluding Some other race, and three or more races	9,897	7,498	12,296

#### Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
