

H007. TENURE BY RACE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS

Data Set: [2002 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	225,474	221,333	229,616
Owner occupied:	144,778	139,680	149,877
Householder who is White alone	116,083	110,572	121,594
Householder who is Black or African American alone	2,826	2,031	3,621
Householder who is American Indian and Alaska Native alone	13,950	12,566	15,334
Householder who is Asian alone	3,658	2,818	4,498
Householder who is Native Hawaiian and Other Pacific Islander alone	132	2	262
Householder who is Some other race alone	1,932	1,181	2,683
Householder who is Two or more races:	6,197	4,197	8,197
Householder who is Two races including Some other race	132	17	248
Householder who is Two races excluding Some other race, and three or more races	6,065	4,064	8,066
Renter occupied:	80,696	77,155	84,237
Householder who is White alone	54,929	51,748	58,110
Householder who is Black or African American alone	4,629	3,850	5,408
Householder who is American Indian and Alaska Native alone	11,138	8,835	13,441
Householder who is Asian alone	3,173	2,373	3,973
Householder who is Native Hawaiian and Other Pacific Islander alone	661	336	986
Householder who is Some other race alone	2,073	1,423	2,723
Householder who is Two or more races:	4,093	2,804	5,382
Householder who is Two races including Some other race	261	17	505
Householder who is Two races excluding Some other race, and three or more races	3,832	2,575	5,089

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '***' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
