

PCT010. FAMILY TYPE BY AGE OF HOUSEHOLDER - Universe: FAMILIESData Set: [2002 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	161,026	154,862	167,190
Married-couple family:	124,240	119,894	128,586
Householder 15 to 24 years	3,285	2,566	4,004
Householder 25 to 34 years	21,390	19,588	23,192
Householder 35 to 44 years	33,095	30,640	35,550
Householder 45 to 54 years	35,295	32,510	38,080
Householder 55 to 59 years	13,054	10,173	15,935
Householder 60 to 64 years	7,133	5,531	8,735
Householder 65 to 74 years	7,473	6,189	8,757
Householder 75 years and over	3,515	2,647	4,383
Other family:	36,786	33,446	40,126
Male householder, no wife present:	12,957	11,022	14,892
Householder 15 to 24 years	1,338	642	2,034
Householder 25 to 34 years	3,243	2,250	4,236
Householder 35 to 44 years	3,302	2,159	4,445
Householder 45 to 54 years	4,011	3,196	4,826
Householder 55 to 59 years	460	216	704
Householder 60 to 64 years	87	0	193
Householder 65 to 74 years	234	21	447
Householder 75 years and over	282	23	541
Female householder, no husband present:	23,829	21,371	26,288
Householder 15 to 24 years	1,846	1,079	2,613
Householder 25 to 34 years	4,699	3,678	5,720
Householder 35 to 44 years	8,422	6,833	10,011
Householder 45 to 54 years	4,950	3,338	6,562
Householder 55 to 59 years	1,118	626	1,610
Householder 60 to 64 years	397	183	612
Householder 65 to 74 years	1,056	366	1,746
Householder 75 years and over	1,341	140	2,542

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Click on the table title to access subject characteristics and code lists related to this table.

1. An “*” entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An “**” entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An ‘-’ entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An ‘-’ following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An ‘+’ following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An “***” entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An “****” entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
