

PCT009. NONFAMILY HOUSEHOLDS BY SEX OF HOUSEHOLDER BY LIVING ALONE BY AGE OF HOUSEHOLDER - Universe: NONFAMILY HOUSEHOLDS

Data Set: [2002 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	64,448	60,666	68,230
Male householder:	36,975	34,523	39,427
Living alone:	29,187	26,737	31,637
Householder 15 to 64 years	24,793	22,483	27,103
Householder 65 years and over	4,394	3,411	5,377
Not living alone:	7,788	6,438	9,138
Householder 15 to 64 years	7,614	6,236	8,992
Householder 65 years and over	174	0	370
Female householder:	27,473	24,955	29,991
Living alone:	21,303	19,429	23,177
Householder 15 to 64 years	16,210	14,535	17,885
Householder 65 years and over	5,093	3,783	6,403
Not living alone:	6,170	4,556	7,784
Householder 15 to 64 years	5,954	4,350	7,558
Householder 65 years and over	216	48	384

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '**' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '''' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '''' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '''''' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
