## P011. HOUSEHOLD SIZE, HOUSEHOLD TYPE, AND PRESENCE OF OWN CHILDREN - Universe: HOUSEHOLDS

Data Set: 2003 American Community Survey Summary Tables Survey: American Community Survey

S. Census Bureau

American FactFinder

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology

	<u>« hide upper and lower bounds</u>		
	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	229,408	225,422	233,394
1-person household:	57,652	54,345	60,959
Male householder	32,080	30,002	34,158
Female householder	25,572	23,237	27,907
2-or-more-person household:	171,756	167,181	176,331
Family households:	156,453	152,133	160,773
Married-couple family:	115,568	111,990	119,146
With own children under 18 years	60,607	56,858	64,356
No own children under 18 years	54,961	52,375	57,547
Other family:	40,885	38,099	43,671
Male householder, no wife present:	13,896	12,354	15,438
With own children under 18 years	9,392	8,218	10,566
No own children under 18 years	4,504	3,497	5,511
Female householder, no husband present:	26,989	24,762	29,216
With own children under 18 years	17,953	16,310	19,596
No own children under 18 years	9,036	7,574	10,498
Nonfamily households:	15,303	13,948	16,658
Male householder	9,122	7,919	10,325
Female householder	6,181	5,127	7,235

## Notes

The 2003 American Community Survey universe is limited to the household population and excludes the population living in institutions, college domitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard

error and thus the lower and upper bounds. A statistical test is not appropriate. 2. An <sup>\*\*\*\*</sup> entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.

4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate. 7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
