American FactFinder

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology

	« hide upper and lower bounds		
	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	229,408	225,422	233,394
Householder 15 to 64 years:	204,967	201,520	208,414
Family households:	143,565	138,730	148,400
Married-couple family:	104,992	100,871	109,113
With own children under 18 years	60,234	56,315	64,153
No own children under 18 years	44,758	42,229	47,287
Other family:	38,573	35,784	41,362
Male householder, no wife present:	13,419	11,931	14,907
With own children under 18 years	9,342	8,173	10,511
No own children under 18 years	4,077	3,136	5,018
Female householder, no husband present:	25,154	22,970	27,338
With own children under 18 years	17,953	16,310	19,596
No own children under 18 years	7,201	5,781	8,621
Nonfamily households:	61,402	57,698	65,106
Householder living alone	46,925	43,057	50,793
Householder not living alone	14,477	13,162	15,792
Householder 65 years and over:	24,441	23,270	25,612
Family households:	12,888	11,499	14,277
Married-couple family:	10,576	9,378	11,774
With own children under 18 years	373	0	971
No own children under 18 years	10,203	9,360	11,046
Other family:	2,312	1,822	2,802
Male householder, no wife present:	477	201	753
With own children under 18 years	50	0	138
No own children under 18 years	427	158	696
Female householder, no husband present:	1,835	1,380	2,290
With own children under 18 years	0	0	270
No own children under 18 years	1,835	1,380	2,290
Nonfamily households:	11,553	9,958	13,148
Householder living alone	10,727	9,123	12,331
Householder not living alone	826	478	1,174

Notes

The 2003 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

1. An 1\*\* entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate. 2. An <sup>\*\*\*\*</sup> entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard

error and thus the lower and upper bounds. A statistical test is not appropriate.

3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.

4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
