Notes

The 2003 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002. However, the Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard An 'entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
An '\*\*' entry in the lower and upper bounds. A statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the simulation of the statistical test is not appropriate.
An '\* untry in the statistical test is not appropriate.
An '\* untry in the statistical test is not appropriate.
An '\* untry in the statistical test is not appropriate.
An '\* of the statistical test is not appropriate.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution. 6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an

open-ended distribution. A statistical test is not appropriate. 7. An '\*\*\*\*\* entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
