H016. TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS Data Set: 2003 American Community Survey Summary Tables Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey M

Householder 35 to 64 years	15,889	13,254	18,524
Householder 65 years and over	3,572	2,508	4,636
Householder not living alone:	8,959	7,711	10,207
Householder 15 to 34 years	6,308	5,413	7,203
Householder 35 to 64 years	2,334	1,641	3,027
Householder 65 years and over	317	132	502

Notes

The 2003 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
 An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard

error and thus the lower and upper bounds. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
 An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+ following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '**' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
