One person households	1,440	1,440	0	0	0	0	0	1,435.0	1.0
Two or more person households	290	0	220	45	20	10	0	680.0	2.3

Note(s) :

1.

Total - Household type

Household type

Part A - Plain language definition

Category to which a person living alone or a group of persons occupying the same dwelling belong. There are two categories: non-family households and family households.

A non-family household consists either of one person living alone or of two or more persons who share a dwelling, but do not constitute a family.

Family households are divided into two subcategories: one-family households and multiple-family households.

A one-family household consists of a single family (e.g., a couple with or without children). A multiple-family household is made up of two or more families occupying the same dwelling.

Part B - Detailed definition

Refers to the basic division of private households into family and non-family households. Family household refers to a household that contains at least one census family, that is, a married couple with or without children, or a couple living common-law with or without children, or a lone parent living with one or more children (lone-parent family). One-family household refers to a single census family (with or without other persons) that occupies a private dwelling. Multiple-family household refers to a household in which two or more census families (with or without additional persons) occupy the same private dwelling.

Non-family household refers to either one person living alone in a private dwelling or to a group of two or more people who share a private dwelling, but who do not constitute a census family.

2.

One family only households

Refers to households that consist solely of one census family without additional persons. In 2001, this category was called 'One-family households' and also included census families with additional persons.

3.

Couple family households

Refers to households with opposite-sex or same-sex couples.

4.

Other family households

Refers to one-census family households with additional persons and to multiple-census family households, with or without additional persons. In 2001, this category was called 'Multiple-family households' and did not include one-family households with additional persons.

Data quality note(s)

- Data quality index showing, for the long census questionnaire (20% sample data), a global non response rate higher than or equal to 5% but lower than 10%.
