Definitions and symbols

Definitions:

36. Immigrant status and period of immigration - 20% sample data

Note: Suppression of citizenship and immigration data on Indian reserves and settlements

Persons living on Indian reserves and Indian settlements who were enumerated with the 2006 Census Form 2D questionnaire were not asked the questions on citizenship (Question 10), landed immigrant status (Question 11) and year of immigration (Question 12). Consequently, citizenship, landed immigrant status and period of immigration data are suppressed using zeros for Indian reserves and Indian settlements at census subdivision and lower levels of geography where the majority of the population was enumerated with the 2D Form. These data are, however, included in the totals for larger geographic areas, such as census divisions and provinces.

For more information on the census data quality and confidentiality standards and guidelines relating to Indian reserves, please refer to http://www12.statcan.gc.ca/census-recensement/2006/ref/notes/dg-gd/reserves-eng.cfm.

For a complete list of Indian reserves and Indian settlements for which citizenship, landed immigrant status and period of immigration data are suppressed using zeros, please refer to http://www12.statcan.gc.ca/censusrecensement/2006/ref/notes/sup_2D-eng.cfm.

37. Non-immigrants

Non-immigrants are persons who are Canadian citizens by birth. Although most Canadian citizens by birth were born in Canada, a small number were born outside Canada to Canadian parents.

38. Immigrants

Immigrants are persons who are, or have ever been, landed immigrants in Canada. A landed immigrant is a person who has been granted the right to live in Canada permanently by immigration authorities. Some immigrants have resided in Canada for a number of years, while others are more recent arrivals. Most immigrants are born outside Canada, but a small number were born in Canada. Includes immigrants who landed in Canada prior to Census Day, May 16, 2006.

39. 2001 to 2006

Includes immigrants who landed in Canada prior to Census Day, May 16, 2006.

40. Non-permanent residents

Non-permanent residents are persons from another country who, at the time of the census, held a Work or Study Permit, or who were refugee claimants, as well as family members living with them in Canada.

41. Citizenship - 20% sample data

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to provide the name of the other country(ies).

Note: Suppression of citizenship and immigration data on Indian reserves and settlements

Persons living on Indian reserves and Indian settlements who were enumerated with the 2006 Census Form 2D questionnaire were not asked the questions on citizenship (Question 10), landed immigrant status (Question 11) and year of immigration (Question 12). Consequently, citizenship, landed immigrant status and period of immigration data are suppressed using zeros for Indian reserves and Indian settlements at census subdivision and lower levels of geography where the majority of the population was enumerated with the 2D Form. These data are, however, included in the totals for larger geographic areas, such as census divisions and provinces.

For more information on the census data quality and confidentiality standards and guidelines relating to Indian reserves, please refer to http://www12.statcan.gc.ca/census-recensement/2006/ref/notes/dg-qd/reserves-eng.cfm.

For a complete list of Indian reserves and Indian settlements for which citizenship, landed immigrant status and period of

immigration data are suppressed using zeros, please refer to http://www12.statcan.gc.ca/census-recensement/2006/ref/notes/sup_2D-eng.cfm.

42. Not Canadian citizens

Includes persons who are stateless. Prior to the 2006 Census, this category was called 'Citizens of other country(ies).' The content of the category remains unchanged in 2006 compared with previous censuses.

43. Generation status - 20% sample data

Refers to the generational status of a person, that is, 1st generation, 2nd generation or 3rd generation or more.

44. 1st generation

Persons born outside Canada. For the most part, these are people who are now, or have ever been, landed immigrants in Canada. Also included in the first generation are a small number of people born outside Canada to parents who are Canadian citizens by birth. In addition, the first generation includes people who are non-permanent residents (defined as people from another country living in Canada on Work or Study Permits or as refugee claimants, and any family members living with them in Canada).

45. 2nd generation

Persons born inside Canada with at least one parent born outside Canada. This includes (a) persons born in Canada with both parents born outside Canada and (b) persons born in Canada with one parent born in Canada and one parent born outside Canada (these persons may have grandparents born inside or outside Canada as well).

46. 3rd generation or more

Persons born inside Canada with both parents born inside Canada (these persons may have grandparents born inside or outside Canada as well).

Symbols:

A adjusted figure due to boundary change

Users wishing to compare 2006 Census data with those of other censuses should then take into account that the boundaries of geographic areas may change from one census to another. In order to facilitate comparison, the 2001 Census counts are adjusted, as needed, to take into account boundary changes between the 2001 and 2006 censuses. The 2001 counts that were adjusted are identified by the letter 'A'. The letter 'A' may also refer to corrections to the 2001 counts; however, most of these are the result of boundary changes. This symbol is also used to identify areas that have been created since 2001, such as newly incorporated municipalities (census subdivisions).

E use with caution

After the release of the 2001 or 2006 Census population and dwelling counts, errors are occasionally uncovered in the data. It is not possible to make changes to the 2001 or 2006 Census data presented in these tables.

Refer to the <u>2001 population and dwelling count amendments</u> or the <u>2006 population and dwelling count amendments</u> for further information.

X area and data suppression

In addition to random rounding, area and data suppression has been adopted to further protect the confidentiality of individual respondents' personal information.

Area and data suppression results in the deletion of all information for geographic areas with populations below a specified size. For example, areas with a population of less than 40 persons are suppressed. If the community searched has a population of less than 40 persons, only the total population counts will be available.

Whenever income data are shown, those areas with populations below 250 persons, or where the number of private households is less than 40, income data are suppressed. If a community searched has less than 250 persons, or if the number of private households is less than 40, the income data will not be available. All suppressed cells and associated averages, medians and standard errors of average income have been replaced with zeros. In all cases, suppressed data are included in the appropriate higher-level aggregate subtotals and totals.

Persons living on Indian reserves and Indian settlements who were enumerated with the 2006 Census Form 2D questionnaire were not asked the questions on citizenship and immigration. Consequently, data are suppressed for Indian

reserves and Indian settlements at the census subdivision level. These data are, however, included in the totals for larger geographic areas such as provinces and territories.

To view the extent to which data are suppressed, see 'suppression criteria'.

† excludes census data for one or more incompletely enumerated Indian reserves or Indian settlements

Excludes census data for one or more incompletely enumerated Indian reserves or Indian settlements (For further information, see the 'Notes'.)

\P incompletely enumerated Indian Reserve or Indian settlement (For further information, see the 'Notes'.)

Due to incompletely enumerated Indian reserves and Indian settlements, data are not available for either the 2006 Census, the 2001 Census or for both the 2001 and 2006 censuses.

Refer to a complete list of these geographic areas.

... not applicable

The possible reasons for the use of the three dots (\cdots) symbol are:

- A value that cannot be calculated such as a percentage change where the denominator is zero;
- A figure is deemed inappropriate for areas that had a population and/or dwelling count amendment in 2001.

Refer to the 2001 population and dwelling count amendments for further information.
