2010	72 856	...	...	...	...	...	...	...

¹ For the years 1951-1956, migrations between municipalities within the county are included.

² Population growth is the difference in population on 1 January between two subsequent years, provided unchanged borders. For 1955, 1960, 1966, 1968 and later years population growth does not equal excess of births plus net migration, see "About the statistics" on: <http://www.ssb.no/folkendrhst/>.
