

**C02005. AMERICAN INDIAN AND ALASKA NATIVE ALONE FOR SELECTED TRIBAL GROUPINGS - Universe: PEOPLE WHO ARE AMERICAN INDIAN AND ALASKA NATIVE ALONE AND PEOPLE WITH NO TRIBE REPORTED**

Data Set: [2006 American Community Survey](#)

Survey: 2006 American Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	88,026	+/-2,936
American Indian tribes, specified:	4,419	+/-1,566
Cherokee	765	+/-409
Chippewa	121	+/-134
Navajo	417	+/-283
Sioux	607	+/-574
All specified other American Indian tribes	2,509	+/-1,307
Alaska Native tribes, specified:	73,461	+/-2,925
American Indian or Alaska Native tribe, not specified	10,146	+/-2,079

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Total includes people who reported one or more tribe or tribal grouping within a specified tribal grouping and no other tribal grouping and no other race; includes people who checked the American Indian or Alaska Native response category and did not write-in a specific tribe; includes people who reported one or more American Indian or Alaska Native tribal grouping not shown separately above or elsewhere classified and no other race, and people who reported two or more of the specified tribal grouping shown above; and includes people who wrote generic terms such as "American Indian," "Alaska Native," "Indian" and so forth.

All Other American Indian tribe includes people who reported one or more American Indian tribe or tribal grouping not shown separately above and no other race; people who reported two or more of the specified tribal groupings shown above; and includes people who reported one or more of the specified tribal grouping shown above in combination with another tribal grouping not shown separately above.

All Other Alaska Native tribe includes people who reported one or more Alaska Native tribe or tribal grouping not shown separately above and no other race; people who reported two or more of the specified Alaska Native tribe or tribal grouping shown above; includes people who reported one or more of the specified Alaska Native tribe or tribal grouping shown above or in combination with another Alaska Native tribal grouping not shown separately above.

American Indian tribes or Alaska Native tribes, not specified includes people who reported one or more American Indian and Alaska Native tribe or tribal grouping.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

#### Explanation of Symbols:

1. An "\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An "\*\*\*\*" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An "\*\*\*\*\*" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
