

[B07003. RESIDENCE 1 YEAR AGO BY SEX IN THE UNITED STATES - Universe: POPULATION 1 YEAR AND OVER IN THE UNITED STATES](#)

Data Set: [2006 American Community Survey](#)

Survey: 2006 American Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	659,992	+/-1,192
Male	339,868	+/-1,736
Female	320,124	+/-1,993
Same house 1 year ago:	515,159	+/-7,786
Male	259,612	+/-5,106
Female	255,547	+/-4,752
Moved within same county:	79,061	+/-6,483
Male	41,882	+/-3,857
Female	37,179	+/-3,768
Moved from different county within same state:	23,025	+/-3,174
Male	14,931	+/-2,309
Female	8,094	+/-1,710
Moved from different state:	37,672	+/-4,943
Male	20,499	+/-2,976
Female	17,173	+/-2,632
Moved from abroad:	5,075	+/-1,721
Male	2,944	+/-1,032
Female	2,131	+/-968

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
