Note(s) :

- Total - Marital status**
 Marital status
 Part A - Plain language definition
 A person's de facto conjugal status. Marital status data are derived from the responses to Question 4 (Marital status) and Question 5 (Common-law) in the census questionnaires. For example, a person who, in Question 4, reported being 'widowed' and in Question 5 reported living with another person as a couple, but not being married to that person, will be counted as married.
 Part B - Detailed definition
 Refers to the conjugal status of a person.
 The various responses are defined as follows:
Married and common-law
 Persons currently married whose spouse is living, unless the couple is separated or divorced, and persons living common-law.
Separated, but still legally married
 Persons currently married, but who are no longer living with their spouse (for any reason other than illness or work) and have not obtained a divorce. Persons who are separated but who live with a common-law partner are not included in this category.
Divorced
 Persons who have obtained a legal divorce and who have not remarried. Persons who are divorced but who live with a common-law partner are not included in this category.
Widowed
 Persons who have lost their spouse through death and who have not remarried. Persons who are widowed but who live with a common-law partner are not included in this category.
Never legally married (single)
 Persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried. Persons who are single and live with a common-law partner are not included in this category.
