Description

Description: Number of new cases of HIV, AIDS, gonorrhoea and syphilis per year.

Figures for all ages plus two selected age groups - 15-24 and 25-44 years.

Data Source/Origin of data

Source: Norwegian Institute of Public Health

Collection: Confirmed cases of HIV, AIDS, gonorrhoea and syphilis are reported by medical microbiological laboratories and physicians to MSIS (Norwegian Surveillance System for Communicable Diseases). These diseases must be reported by law according to the Communicable Diseases Act. The Norwegian Institute of Public Health operates MSIS and coordinates surveillance in health institutions.

Data quality: HIV infection, AIDS, gonorrhoea and syphilis must be reported to MSIS. The duty to report is normally fulfilled, although mildly affected persons may not seek a physician and therefore not be registered.

Divided by

Time periods: HIV infection 1984-2008

AIDS 1983-2008

Gonorrhoea and syphilis 1993-2008

Geographical level: Norway, counties

Gender: Men, women

Age groups: All ages, 15-24, 25-44

Frequency of updates: Annual

Last updated: 6/15/09
