The table covers sold human drugs with marketing authorisations in Iceland. They are classified according to ATC (Anatomical-Therapeutical-Chemical Classification), an international classification maintained by the World Health Organisation. Sales value is shown in million ISK at retail prices including VAT according to reference price list each month. The price for OTC-medicines is excluded and its sales value in this table as of the year 2007. The quantity of OTC-medicines is included. Quantity is shown in Defined Daily Dose (DDD) pr. 1,000 inhabitants. DDD is according to WHO standard of each year.

Sale/consumption: Sales value, Million ISK: The sales value of OTC-medicines is excluded as of the year 2007.

Latest update: 20151111

Units: Million ISK /DDD per 1,000 inhabitants

Reference period: 1989-2014
