

B18005. SEX BY AGE BY MENTAL DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

Alaska		
	Estimate	Margin of Error
Total:	585,263	+/-1,500
Male:	294,238	+/-1,780
5 to 15 years:	59,085	+/-1,345
With a mental disability	3,840	+/-1,033
No mental disability	55,245	+/-1,670
16 to 20 years:	27,122	+/-1,748
With a mental disability	1,714	+/-604
No mental disability	25,408	+/-1,696
21 to 64 years:	187,956	+/-2,081
With a mental disability	9,090	+/-1,499
No mental disability	178,866	+/-2,425
65 to 74 years:	13,670	+/-705
With a mental disability	716	+/-315
No mental disability	12,954	+/-727
75 years and over:	6,405	+/-489
With a mental disability	1,516	+/-402
No mental disability	4,889	+/-643
Female:	291,025	+/-1,333
5 to 15 years:	57,032	+/-1,004
With a mental disability	1,145	+/-471
No mental disability	55,887	+/-1,097
16 to 20 years:	25,619	+/-1,545
With a mental disability	1,624	+/-572
No mental disability	23,995	+/-1,574
21 to 64 years:	186,293	+/-1,536
With a mental disability	9,498	+/-1,531
No mental disability	176,795	+/-2,243
65 to 74 years:	12,732	+/-630
With a mental disability	780	+/-315
No mental disability	11,952	+/-723
75 years and over:	9,349	+/-651
With a mental disability	2,202	+/-521
No mental disability	7,147	+/-678

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
