

B18005. SEX BY AGE BY MENTAL DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER

Data Set: [2006 American Community Survey](#)
Survey: 2006 American Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

Alaska		
	Estimate	Margin of Error
Total:	605,065	+/-1,896
Male:	305,857	+/-2,086
5 to 15 years:	57,595	+/-1,407
With a mental disability	2,879	+/-778
No mental disability	54,716	+/-1,609
16 to 20 years:	28,227	+/-2,183
With a mental disability	1,869	+/-581
No mental disability	26,358	+/-2,187
21 to 64 years:	200,259	+/-2,423
With a mental disability	8,354	+/-1,275
No mental disability	191,905	+/-2,791
65 to 74 years:	12,918	+/-506
With a mental disability	735	+/-383
No mental disability	12,183	+/-495
75 years and over:	6,858	+/-571
With a mental disability	1,318	+/-411
No mental disability	5,540	+/-550
Female:	299,208	+/-1,647
5 to 15 years:	51,951	+/-1,390
With a mental disability	2,270	+/-856
No mental disability	49,681	+/-1,585
16 to 20 years:	25,907	+/-1,993
With a mental disability	843	+/-428
No mental disability	25,064	+/-1,930
21 to 64 years:	198,051	+/-1,885
With a mental disability	10,014	+/-1,740
No mental disability	188,037	+/-2,486
65 to 74 years:	13,062	+/-662
With a mental disability	1,039	+/-345
No mental disability	12,023	+/-729
75 years and over:	10,237	+/-779
With a mental disability	2,338	+/-692
No mental disability	7,899	+/-776

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
