

B18006. SEX BY AGE BY SELF-CARE DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska		
	Estimate	Margin of Error
Total:	585,263	+/-1,500
Male:	294,238	+/-1,780
5 to 15 years:	59,085	+/-1,345
With a self-care disability	215	+/-170
No self-care disability	58,870	+/-1,343
16 to 20 years:	27,122	+/-1,748
With a self-care disability	333	+/-282
No self-care disability	26,789	+/-1,729
21 to 64 years:	187,956	+/-2,081
With a self-care disability	3,549	+/-740
No self-care disability	184,407	+/-2,177
65 to 74 years:	13,670	+/-705
With a self-care disability	744	+/-348
No self-care disability	12,926	+/-711
75 years and over:	6,405	+/-489
With a self-care disability	938	+/-367
No self-care disability	5,467	+/-574
Female:	291,025	+/-1,333
5 to 15 years:	57,032	+/-1,004
With a self-care disability	311	+/-354
No self-care disability	56,721	+/-1,098
16 to 20 years:	25,619	+/-1,545
With a self-care disability	136	+/-160
No self-care disability	25,483	+/-1,571
21 to 64 years:	186,293	+/-1,536
With a self-care disability	4,766	+/-942
No self-care disability	181,527	+/-1,637
65 to 74 years:	12,732	+/-630
With a self-care disability	1,210	+/-422
No self-care disability	11,522	+/-764
75 years and over:	9,349	+/-651
With a self-care disability	2,215	+/-516
No self-care disability	7,134	+/-678

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
