

**B18006. SEX BY AGE BY SELF-CARE DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER**

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska			
	Estimate	Lower Bound	Upper Bound
Total:	577,744	576,032	579,456
Male:	287,878	284,335	291,421
5 to 15 years:	58,833	56,463	61,203
With a self-care disability	1,049	566	1,532
No self-care disability	57,784	55,429	60,139
16 to 20 years:	27,701	24,985	30,417
With a self-care disability	239	4	474
No self-care disability	27,462	24,789	30,135
21 to 64 years:	183,019	180,317	185,721
With a self-care disability	3,468	2,419	4,517
No self-care disability	179,551	177,361	181,741
65 to 74 years:	12,472	11,713	13,231
With a self-care disability	559	350	768
No self-care disability	11,913	11,119	12,707
75 years and over:	5,853	5,214	6,492
With a self-care disability	1,571	817	2,325
No self-care disability	4,282	3,568	4,996
Female:	289,866	286,645	293,087
5 to 15 years:	56,317	55,124	57,510
With a self-care disability	855	311	1,399
No self-care disability	55,462	54,177	56,747
16 to 20 years:	25,629	23,517	27,741
With a self-care disability	104	0	275
No self-care disability	25,525	23,425	27,625
21 to 64 years:	187,044	184,704	189,384
With a self-care disability	6,341	4,936	7,746
No self-care disability	180,703	178,437	182,969
65 to 74 years:	12,907	12,185	13,629
With a self-care disability	800	360	1,240
No self-care disability	12,107	11,332	12,882
75 years and over:	7,969	7,193	8,745
With a self-care disability	1,652	1,133	2,171
No self-care disability	6,317	5,345	7,289

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

**Explanation of Symbols:**

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
